TEAM UP TO BATTLE FOR POWER!

The legendary Toa Nuva return to Karda Nui, the core of the universe, for the ultimate battle! Teaming up with Matoran of Light, they use their Midak Skyblasters that shoot spheres of white light to fight the Forces of shadow!

But the Brotherhood of Makuta is waiting for them, using Tridax pods filled with shadow leeches to corrupt their enemies.

THE FINAL BATTLE IS ABOUT TO BEGIN!

8693 CHIROX AND 8949 KIROP

One of the Brotherhood's top scientists, Chirox is known for creating monstrous Rahi. His Kanohi Shelek, the Mask of Silence, temporarily robs enemies of the ability to speak or hear. Kirop's power to temporarily rob a foe of his sight makes them a lethal combination in a fight.

8691 ANTROZ AND 8947 RADIAK

The leader of the Makuta in Karda Nui, Antroz is an aggressive warrior. His Kanohi Jutlin, the Mask of Corruption, causes items to rot and break down. Radiak flies with him, using his special power to slow the actions of the Toa and make them easy targets.

**8692 VAMPRAH AND
8948 GAVLA**

Vamprah is a silent hunter, swooping down on his black wings and using his Kanohi Avsa, the Mask of Hunger, to feed on the hopes and dreams of his victims. Gavla's power to disrupt a foe's sense of balance makes her dangerous in aerial combat!

8686 LEWA NUVA AND 8944 TANMA

The Toa Nuva of Air relies on his high-tech jet pack to fly and his Mask of Levitation to help him do complex air maneuvers. Tanma acts as a living source of light energy for Lewa's Skyblaster.

8685 KOPAKA NUVA AND 8945 SOLEK

The Toa Nuva of Ice would rather fight alone, relying on his Mask of X-Ray Vision and ice bayonet. But Solek's power to create objects of solid light may provide the edge that wins a battle!

8687 POHATU NUVA AND 8946 PHOTOK

The Toa Nuva of Stone uses massive propellers to fly. His Mask of Speed, combined with Photok's lightspeed power, makes him the fastest thing in the air!

TEAM UP FOR MORE POWER!

Motoran sets attach to Toa and Makuta sets for double the power in battle!

INDIANA JONES

"If adventure came in plastic...
It must be from LEGO."

BEHIND THE BRICKS:

LEGO® INDIANA JONES™!

You've been demanding them for years, and they're finally here: LEGO sets from the *Indiana Jones* movies have arrived! We spoke with one of the designers of these action-packed models about just what went into translating Indy's adventures from the big screen to the LEGO brick.

DESIGNER PROFILE

Name: Adam Grabowski
Job: LEGO Designer
Designed: 7623 Temple Escape

Adam came to The LEGO Company from the University of Wuppertal in Germany, where he studied design. Before working on LEGO *Indiana Jones*, he created design sketches for EXO-FORCE, LEGO *Star Wars*™ and more.

Q How is a LEGO Indiana Jones set designed?

A The process usually begins with collecting all of the movie material that we could possibly need. Then the whole team brainstorms together about what scenes can be done in LEGO bricks. We make sketches, test them with kids, and if we're happy with the results, we take the 4-5 best ideas and turn them into the actual sets. It sounds easier than it really is; the process from sketch to product takes around three months of intensive thinking and building!

Q What research did you have to do before designing the sets?

A We were allowed to use the Lucasfilm archive, of course, but for *Indiana Jones*, we more or less built what we thought would be cool sets. We're all huge fans of the movies, so everybody had the DVDs, and we had some books too. Plus, today you can find almost everything on the internet, so I'd say research was the easy part.

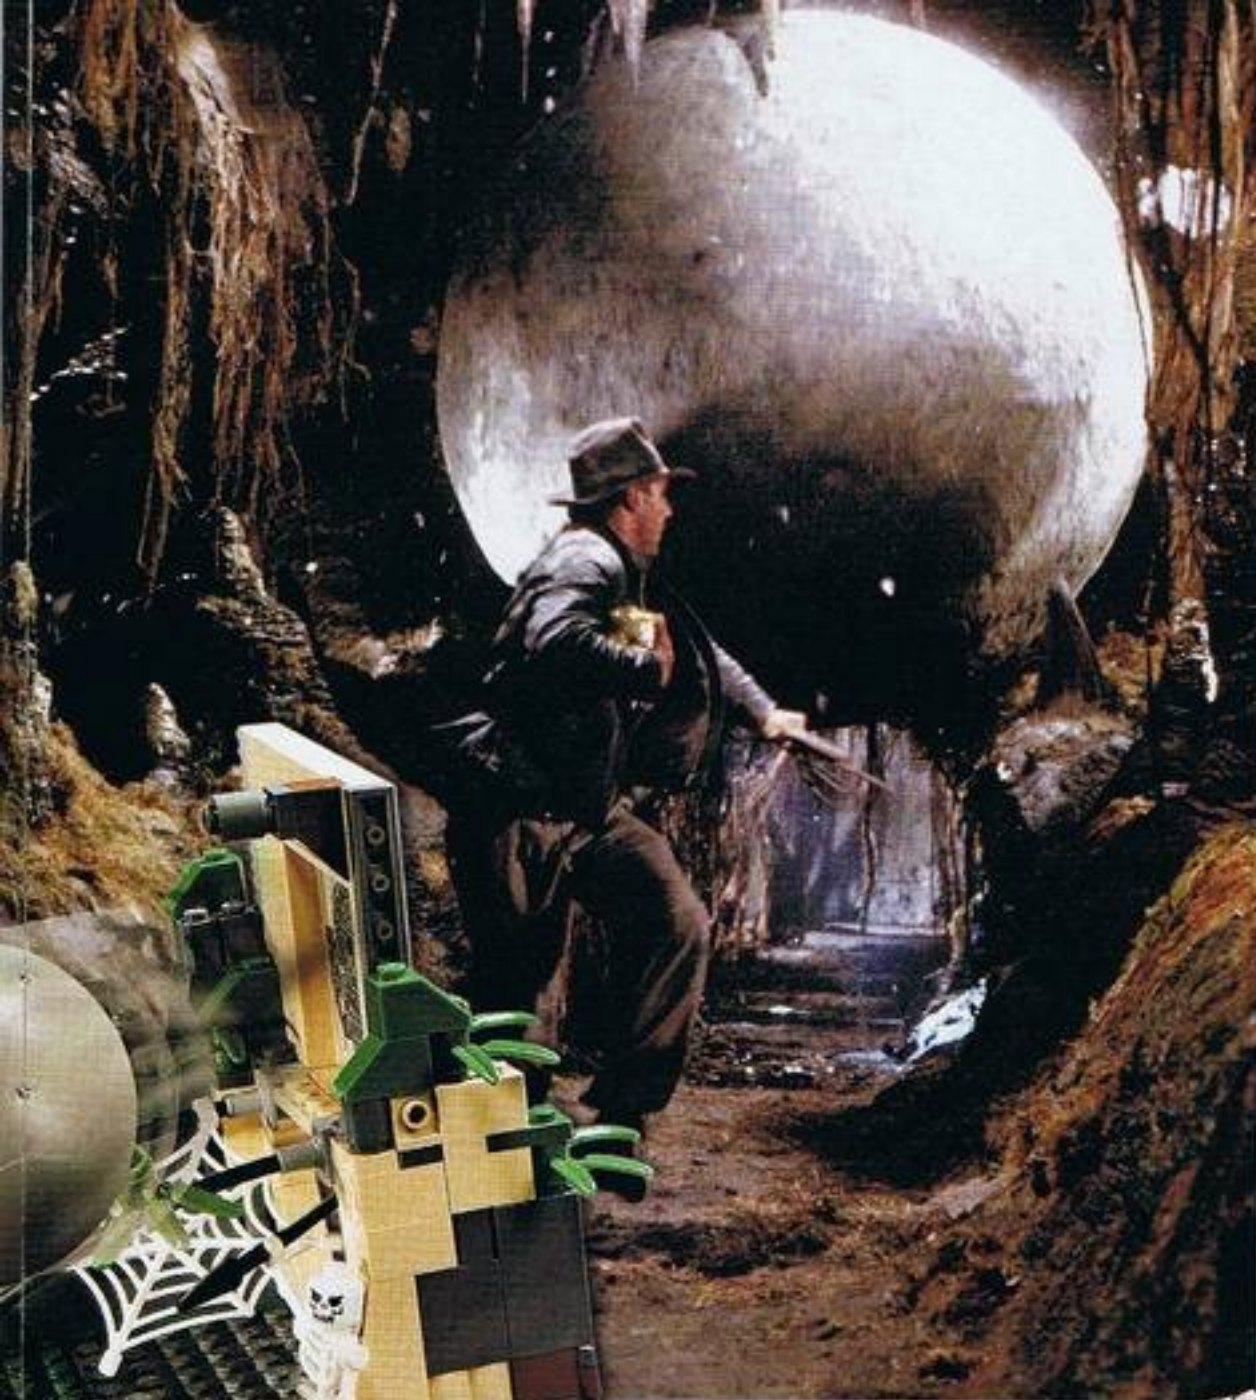

Q How do you adapt a scene or vehicle from the movies to LEGO brick form?

A The first thing to decide is what scene might be interesting for LEGO fans. *Star Wars* is very vehicle-based, so it's quite easy to make something kids will like even if they haven't seen the movies, but *Indiana Jones* is more character-based. You want to make sure that the set has features that any kid could play with.

INDIANA JONES

© 2008 Lucasfilm Ltd. & TM.

Q: How did you decide what special features to include in the Indy sets?

A: You try to build the functions so that you can reenact all the key scenes from the movie. I was lucky; the boulder scene includes all the traps that you see in the movie, including the pit. For 7622 Race for the Stolen Treasure, we added some treasure inside the Ark so that kids who haven't seen the movie will have a reason for Indy to chase the truck. Other than that, we tried to stay as true to the movie as we could.

Q: What's your favorite part of the Temple Escape model?

A: I like the little dinosaurs on the entrance that are turned upside-down and look like faces. Other than that, it's probably the Golden Idol, which is a really cool new LEGO piece.

Thanks, Adam!
And to you and the other LEGO Indiana Jones designers... great job! ■

NEW MISSION. NEW MACHINES!

Get ready for a revolution in battle machine design. Built for combat in the dense jungles of Sentai Mountain, these mobile war machines have bigger weapons, tougher armor, cutting-edge camo patterns, and a whole new EXO-FORCE technology: weapons and gear that detach and convert to mini-robot scouts and soldiers. ■

8117 STORM LASHER

These buzzing robot sentries prowl the jungle skies. If they spot an EXO-FORCE battle machine, their spinning turbine blades can slash right through the treetops for a clear shot.

**MINI-ROBOT
SPECIAL FUNCTION:**
Surveillance and reconnaissance scouting.

8113 ASSAULT TIGER

Takeshi's heavy-duty new battle machine is massively armed and armored for intense combat action. Its tiger-stripe camouflage helps it blend in with the jungle trees – until the roar of its mega-buzzsaw blade reveals its presence to any unlucky robots around.

**MINI-ROBOT
SPECIAL FUNCTION:**
Twin chainsaws rip apart enemy armor.

8115 DARK PANTHER

Programmed for ambush attacks from the forest shadows, Dark Panthers are perfectly designed for high-impact jungle combat. They can leap incredible distances and hit moving targets with their adjustable back-mounted blasters, and if that's not tough enough, each one carries a pair of aerial drone flyers to triple the odds of victory.

**MINI-ROBOT
SPECIAL FUNCTION:**
Equipped with video uplink transmitter and electric shield.

8114 CHAMELEON HUNTER

Hikaru rules the jungle canopy in his multi-bladed battle machine. Equipped with the latest stealth technology and nano-camo armor plating, it strikes fast with its flame-blaster cannon and capture claw, then disappears into the trees without a trace.

**MINI-ROBOT
SPECIAL FUNCTION:**
Heat blades sabotage key enemy systems.

LEGO EXO-FORCE

The jungle mission has begun. In the battle of humans against robots, who will win...and who will fall?

The new MX-41 Switch Fighter is on the hunt for Martian energy crystals...but the aliens are hunting it, too. Good thing the Switch Fighter can quickly convert from land recon mode to air attack mode to battle on multiple terrains!

Did you know that LEGO building isn't something you can only do by yourself - it's something you can do with your whole Family!

Ethan (8), Natalie (5), Kevin (Dad) and Jodi (Mom) were one of the winning families in our Family Building Challenge. What would you build with your family?

All around the country, parents and kids are creating cool models together, just like the one you see on this page. Sound like fun? Here are some things you can do to have LEGO building fun with your own family:

- Ask your parents about having a "LEGO Family Building Night" at your house. Everyone can build their own model, or you can all work on one big one together!
- You and your parents can check out the excitement at the LEGO Creation Nation website at www.LEGOcreationnation.com. Find out about creative events in your area or apply for the first \$5000 LEGO Creativity Award!
- Read your LEGO Magazine together! Ever shared the comics, articles, and activities with your parents, brothers or sisters? Here's your chance! Who knows, they might like it just as much as you do!
- Ask your parents or teachers about starting a LEGO Club in your community or at your school. You and your friends can get together and see who can build the most awesome models!

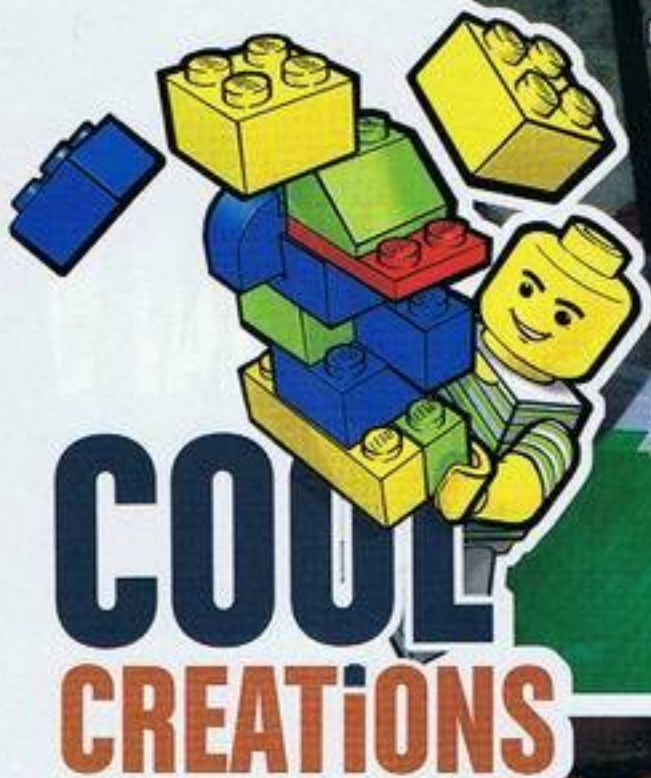

- Have your own LEGO building contest! Pick something - your house, your pet, your car, anything - and everyone build their own model of it. Then choose the best model - or upload pictures of all the models to Cool Creations on www.LEGO.com/club and let the world see them!

These are just a few fun ideas for how you can have a LEGO building experience with your family. Want to know more? Check out www.LEGO.com/club, click on "Building Tips and Ideas," then click on "Family Building!" ■
